

Number Game Puzzle Documentation (v1.0)

Thank you to anyone who bought this package. Please feel free to ask me any question about **Number Game Puzzle**

You can only publish games on Google Play, App store and other mobile stores.

1. Overview

Number Game Puzzle game template of the most popular genre for mobile platforms. You do not need to know any programming language to configure and use it. It is very easy to fill it with your own tasks, make UI changes , and start to gain experience in promoting your game and earning money.

2. Requirement

- Unity **2022.3.16f1** or higher
- The template works best with the version used by our developers (Unity **2022.3.16f1**). So if there are any issues with your newer version, please let us know. If we can't solve them, you are required to use the same Unity version with us.

3. How to import a project(Please contact us via email to get the decompression password) ?

- Open Unity **2022.3.16f1** , click "Open project" → Choose "**NumberGame_v1.0**" folder → Wait until the import process completes.
- Double click on **Game** in Assets/DM_Scenes/Scenes folder → click Play button.

4. How to build for Android (64 bit complaint Google Play)

Refer tutorial :

<https://learn.unity.com/tutorial/publishing-for-android#5ecf930aedbc2a002088a2cc>

- Click File/Build Settings : Choose Add Open Scenes, Android Platform -> Click Switch Platform and wait until the import process completes.

- Go to Player Settings and look at the Configuration section:

- Scripting backend: Set to IL2CPP
- Uncheck x86

Building for Android sometimes gets errors because of your environment. If you encounter any errors, please make sure that your building environment is set up correctly by creating a new empty project and then building. If it fails to build, then you have to find a way to fix it.

If you succeed to build an empty project and still encounter error when building my project, then:

- Use the same Unity version with us (Unity **2022.3.16f1**)
- Feel free to contact us

5. How to change package name, game name, icon

- Change Package name

Click File/Build Settings : Choose Player Settings . On the Inspector panel, click Other Settings. And edit your Package Name

- Change game name ,icon

6. How to CONFIG(Admob)

To see the **CONFIG Mobile ads**, please click on the menu **Dotmob/Mobile Ads** → look at the Inspector at the right side

Change your Admob id and click **Save**

Select the ad providers you want to enable for each platform:

Android Admob

Download Admob SDK

Test Mode ☐

Test Device ID

App ID

Banner ID

MRec ID

Interstitial ID

Rewarded Video ID

Rewarded Interstitial ID

App Open ID

Directed for children ☐

iOS None

Save

- Click Menu Assets/Google Mobile Ads

Change your Admob App ID

Preparing for build

Before building make sure to Force Resolve your Android dependencies.

Note : You can check admob works in 2 ways:

- Use your admob id (authenticated account) and add test devices:

<https://support.google.com/admob/answer/9691433>

- Use Google's admob test ID: <https://developers.google.com/admob/android/test-ads>

Alternatively, you can check including the required Google Play dependencies in your Unity project. Ensure the required AAR and JAR files are located in the Assets / Plugins / Android directory. You can perform dependency resolution by selecting Assets -> external dependency manager -> Android Resolver -> Force Resolve in the Unity editor

7. How to reskin

Almost all graphics are located in the folder **Assets/DM_Images**. You need just replace your art in this folders, keep the same name, same size in PNG format

9. How to Reset Game

Click menu Edit/Clear All PlayerPrefs to reset game

10. 11.How to setup Leaderboard (Only Android)

- Create Leaderboards on New Google Play Console (refer video tutorial : <https://www.youtube.com/watch?v=umJrw8Mfoso>)

- Config Google Play Services on Unity

Google Play Games - Android Configuration

To configure Google Play Games in this project, go to the Play Game console, then enter the information below and click on the Setup button.
[Open Play Games Console](#)

Constants class name
Enter the fully qualified name of the class to create containing the constants

Directory to save constant:

Constants class name:

Resources Definition
Paste in the Android Resources from the Play Console

```
<?xml version="1.0" encoding="utf-8"?>
<!--Google Play game services IDs. Save this file as res/values/games-ids.xml in your project-->
<resources>
  <!--app_id-->
  <string name="app_id" translatable="false">447265896346</string>
  <!--package_name-->
  <string name="package_name" translatable="false">com.Dotmob.JewelBlockPuzzle</string>
  <!--leaderboard Classic 10x10 Mode-->
  <string name="leaderboard_classic_10x10_mode" translatable="false">Cgklmu__mll</string>
  <!--leaderboard Classic 8x8 Mode-->
```

Web App Client ID (Optional)
The web app client ID is needed to access the user's ID token and call other APIs on behalf of the user. It is not required for Game Services. Enter your oauth2 client ID below.
To obtain this ID, generate a web linked app in Developer Console. Example: 123456789012-abcdefghijklm.apps.googleusercontent.com

Client ID:

Click Setup

- Click menu **Dotmob/Game Services**

Change your Google Play App ID, Google Play ID and click SAVE

Note : Your game needs to be published to Alpha, Beta or Production and installed from the Google Play Store for play services to work.

If you get this error at build:

Colliding APP_ID

Go to **Assets -> Plugins -> Android** and delete **GooglePlayGamesManifest**

Delete Manifest

This warning is normal. Is thrown by Google SDK because you did not use their setup window. Just close it.

11. How to setup IAP (in-app purchases)

IAP is setup using the IAP Settings window which can be opened by selecting the menu item **Dotmob /IAP**

Easy IAP - v.2.0.4

Debug ☐

Use Receipt Validation ☐

Enable Visual Scripting Tool:

Playmaker ☐

Unity Visual Scripting ☐

Select your platforms:

Google Play ☒

Amazon ☐

iOS ☐

MacOS ☐

Windows Store ☐

Import Unity IAP SDK

In App Products Setup

Product Name: product_1

Product Type: Consumable

Reward Value: 20

Google Play ID: com.dm.remove

Remove Product

Product Name: product_2

Product Type: Consumable

Reward Value: 20

Google Play ID: com.dm.hint

Remove Product

Product Name: product_3

Product Type: Consumable

Reward Value: 20

Google Play ID: com.dm.undo

Remove Product

Product Name: removeads

Product Type: Non Consumable

Reward Value: 0

Google Play ID: com.dm.removeads

Remove Product

Add new product

Save

Change your **Google Play ID** and click **SAVE**

Enable IAP

To enable IAP first you need to import the Unity plugin from the Services window. Open the Services window and turn on IAP then click the Install the latest version button:

- When you register in-app products on stores (Google Play, iTunes), make sure that the product ids are identical in both places (the stores and Unity).
- In-app purchase only works on your device (Android, iPhone ..) after you publish the game.

12. How to change UI localization

All UI text is localized, making it easy for you to add or edit text in various languages.

Click Menu : **Dotmob/Localization**

Change your text and click **SAVE**
